

Dicky Adhi Satria

Backend Developer | Node.js · TypeScript · Go · Python · SQL · RDBMS · REST API

Indonesia | dicky2ux@gmail.com | [LinkedIn](#) | Open to Hybrid / Remote / In-Office

SUMMARY

Backend Developer with 2+ years building and optimizing enterprise-grade microservice APIs, including a system serving 5,000+ employees at PT Pelindo and geospatial platforms reducing query latency by up to 50%. Holds a machine learning research background (CNN/TensorFlow) providing cross-domain technical depth.

EXPERIENCE

Freelance AI Engineer · [PT Sigma Cipta Utama](#) (client: PT Pertamina)

Remote

Dec 2025 – Jan 2026

- ▶ Accelerated PT Pertamina's data-driven decision-making by collecting, cleaning, and processing raw operational datasets into structured analytical outputs under the Metadata Management & Data Analytics Solution (PENGADAAN JASA PENGELOLAAN METADATA) project.
- ▶ Developed and maintained ML-based data modeling pipelines — applying statistical methods and machine learning — to transform unstructured Pertamina data into business insights that directly supported management decision-making.

Key Tech: Python, Pandas, NumPy, scikit-learn, SQL, Machine Learning, Statistical Analysis, Data Modeling, Metadata Management

Entry-Level Backend Developer · [KMPlus Consulting](#) (client: PT Pelabuhan Indonesia)

Remote — Jakarta

Jan 2023 – Sep 2025

- ▶ Developed and delivered scalable microservice REST APIs for PELINDO's Knowledge, Learning, Talent & Culture Management System, enabling reliable access for 5,000+ employees across multiple business units.
- ▶ Reduced average database response time by 80% by rewriting raw SQL queries with optimized joins, indexing strategies, and query plan analysis.
- ▶ Improved service reliability and code quality by leading debugging cycles and code reviews, contributing to measurable reduction in production errors.

Key Tech: Node.js, TypeScript, Go, ExpressJS, NestJS, Echo, MySQL, REST API, Docker, Git, RabbitMQ, Redis, Jenkins, ArgoCD

Backend Developer Intern · [PT Teknologi Mulia Sejahtera Cemerlang](#)

Remote — Depok

Aug 2022 – Dec 2022

- ▶ Delivered WebGIS backend APIs with PHP CodeIgniter and integrated frontend data flows, reducing project delivery delays within a 5-month internship timeline.
- ▶ Improved geospatial query performance by 50% by designing spatial databases with PostgreSQL and PostGIS, including proper spatial indexing and geometry type selection.
- ▶ Increased data processing throughput by 40% through schema optimization and deployment pipeline improvements, while managing full UAT documentation.

Key Tech: PHP, CodeIgniter, PostgreSQL, PostGIS, Agile, UAT

PROJECTS

Backend Developer · [Tilikan Indonesia & Tanggapi Aceh](#)

Remote — Aceh, Indonesia

Oct 2025 – Dec 2025

- ▶ Engineered real-time GeoJSON delivery APIs backed by PostGIS, enabling sub-second map rendering for citizen-facing geospatial reporting platforms.
- ▶ Built automated report routing logic that forwarded citizen submissions to the correct government agency tier, reducing manual dispatch overhead.
- ▶ Secured platform data and maintained stability during traffic peaks by implementing JWT/OAuth2 authentication and server-side caching.

Key Tech: TypeScript, NestJS, PostgreSQL, PostGIS, GeoJSON, JWT, OAuth2, Redis, RabbitMQ

Backend Developer · [Agavi Institute LMS](#)

Remote — Bandung, Indonesia

Jul 2023 – Jun 2025

- ▶ Architected and maintained the full backend of a Learning Management System for PT Agritama Sinergi Inovasi, supporting 500+ active users with zero-downtime deployments throughout a 2-year production lifecycle.
- ▶ Built reusable API integrations and role-based user management, reducing future feature development time through modular service design.

Key Tech: Node.js, Express (LMS Service), TypeScript, NestJS (Auth Service), PostgreSQL, JWT, OAuth 2.0, Cloudinary, Railway

EDUCATION

B.E. Electrical Engineering · [Indonesia University of Education \(UPI\)](#)

Bandung, Indonesia

Jun 2019 – Aug 2024

Major: Electrical · Minor: Telecommunication · GPA: 3.44 / 4.00

- Thesis: Lung X-ray disease classification using CNN (EfficientNetB7) in TensorFlow/Keras — achieved high diagnostic accuracy; defended with commendation, Aug 2024.

SKILLS

Programming Languages	: Node.js/TypeScript, Go, Python, PHP
Frameworks	: Express, NestJS, Echo, Codelgniter
Databases	: PostgreSQL, MySQL, PostGIS, Redis
API Development	: REST, OpenAPI/Swagger, JWT, OAuth2
DevOps	: Docker, Jenkins, ArgoCD, Railway
Messaging / Queue	: RabbitMQ
QA & Tooling	: Jest, Supertest, Postman, Git, GitHub, GitLab
ML / AI	: TensorFlow, Keras, Pandas, NumPy, scikit-learn
Geospatial	: PostGIS, GeoJSON, spatial indexing

CERTIFICATIONS & COURSES

Software Engineer	— HackerRank	Jun 2026
Go (Basic)	— HackerRank	Jun 2026
Getting Started with Git and Github	— HackerRank	Aug 2025
JavaScript (Intermediate)	— HackerRank	Sep 2024
REST API (Intermediate)	— HackerRank	Sep 2024
PTESOL — English Proficiency	— Indonesia University of Education	Jul 2024 – Jul 2026
SQL (Advanced)	— HackerRank	Dec 2023
Problem Solving (Basic)	— HackerRank	Dec 2023
Python for Data Science, AI & Development	— IBM	Jul 2023
THRIVE Tech Enthusiast — Software Development	— Telkomsel	Oct 2022
JavaScript Back End Developer	— Binar Academy	Jul 2022
Node.js (Basic)	— HackerRank	Jul 2022
